## Projects

---

- **Stellar Store - Explore, Shop, and Elevate Your Premium E-Commerce Experience:** Led the end-to-end development of a cutting-edge e-commerce platform using **Next.js 13**, **Tailwind CSS**, and seamless **Stripe** integration, delivering a user-centric shopping experience. Orchestrated a dynamic e-commerce solution by building a comprehensive dashboard with Next.js 13's API directory, seamlessly fetching and presenting data on our frontend, creating a streamlined and responsive user interface.
- **Supafyi - Discover, Create, and Enjoy Your Own Songs:** Developed an application imitating the Spotify design using **Next.js 13** and **TailwindCSS** for navigation and visually appealing styling. Integrated **Supabase** for user authentication, preferences storage, and song data retrieval. Implemented secure payment transactions within the application by integrating the **Stripe** payment gateway API. Created custom functionalities such as user authentication, song uploadation, song search, and playback controls to mimic the Spotify's core features.
- **Genius - A Multi-Tool AI Generation Project:** Led a project using five different AI generation tools, powered by **OpenAI** and **Replicate** API, built with **Next.js 13**, **Tailwind CSS**, and **Stripe** for payments. Combined advanced AI tools like image, video, music, code, and text generation to create an innovative suite of applications.

## Education

---
